

**Did you study science or technology at university? Want to share your experiences with young people? Then join us for:**

## **STEM Speed Dating!**

Are you involved in the STEM (Science, Technology, Engineering and Maths) field? Did you study a STEM degree and are using those skills in the workplace? Are you working in a different area, or applying your studies in an unusual or non-traditional way?

Each January, The National Youth Science Forum (NYSF) brings 400 Year 12 students to Canberra for a 12-day immersive science experience. In 2016, we want to connect students with people like you in two “speed dating” sessions.

For more information & to register to participate, visit:

**Science Forum**

### **How does it work?**

In an informal setting, you'll talk to a small group of students for 3-5 minutes about your career path. The students might ask you about your study, fields of research, and current role, how you got to where you are today, and where you might be heading. In each session you'll rotate through the small groups, talking to several by the end of the session.

---

### **Where and when?**

Both sessions will be held at The Australian National University in Canberra. You're welcome to come to one or both, and to invite your colleagues to join in.

#### **Session A:**

**Monday 11 January,  
9:30am – 12pm**

#### **Session C:**

**Monday 25 January,  
9:30am – 12pm**
